Date of Filing the Application 29.05.2014

Country of Origin GE

Published Appellation KINDZMARAULI

ICGS 33

Type of Good or Specific Product wine

Description of Product Special Quality:

“Kindzmarauli” - premium-quality, red natural semi-sweet wine of geographical appellation. It is produced with the grape species “Saperavi”.

Wine “Kindzmarauli” is characterized by dark pomegranate tint, it has harmonious taste, full velvet, piquant and pleasant sweetness, with fruit tones and species-specific aroma.

Chemical characteristics of the wine “Kindzmarauli” should correspond to the following indicators:

Volumetric spirit-content - 10,5% -12,0%

Mass concentration of sugars of no more than 30-50 gr/dm³

Titrated acidity – 5-7 gr/dm³

Volatile acidity of no more than 1,2 gr/dm³

Mass concentration of finished extract of no less than 20 gr/dm³

Concentration of total mass of sulphuric acid of no more than 210 gr/dm³

Concentration of free sulphuric acid of no more than 30 gr/dm³

Link with the geographical origin:

The microclimate developed under the influence of foothills bordering the Caucasioni high mountains from the south and skeletal soils developed on the black slates drifted by the rivers. Ecological plasticity provides beneficial conditions for vineyards, as well as gives unique quality to the vine species “Saperavi”. This provides specific taste values of naturally semi-sweet wine “Kindzmarauli”.

Geographical zone:

The micro-zone of wine “Kindzmarauli” is located in eastern Georgia, in Inner Kakheti, in the administrative region of Kvareli, on the southern slope of Caucasioni fork, with the coordinates of northern latitude of 41'30 P and eastern longitude of 45'5 0R. Industrial vineyards are mainly located at 250-550 m above sea level, on the left side of the river Alazani (region).

The plain foots are occupied by Alazani plain, which is elevated northwards, transmits into the foothills and borders the foots of Caucasioni.
